

## Do you supply non-plastic items?

## Submit your Portfolio to be linked to clients in the Hospitality and Tourism Industry

Despite Covid-19, the Single Use Plastic Ban will still come to effect on 05 June 2020. We want hotels, lodges and tour companies to be able to take advantage of this slow business period to source for alternatives.

Let us link you with potential clients.

## About Us

The Sustainable Inclusive Business (SIB-K) is a Knowledge Centre under the Kenya Private Sector Foundation (KEPSA). The knowledge centre was launched in 2015 in response to a need for a neutral platform to support companies to increase their positive impact on People and the Planet and reduce their carbon footprint.

As part of KEPSA, SIB-K facilitates dialogue, partnerships and creates an enabling environment for sustainability. SIB-K brings together participants drawn from the industry ecosystem to bring together business enablers and partners and initiates engagement platforms to promote partnerships and support companies and organizations conduct sustainable business practices. More information on SIB-K can be found in <https://www.sustainableinclusivebusiness.org/>.

## Context

Kenya has employed a lot of effort in tackling plastic, both from the government, civil society and private sector. Since the Plastic Ban Act 2017 took effect, we have seen behavioral and cultural changes across the country as Kenyans learn to bring their own bags and businesses find alternatives to packaging. However, there still remains a big need in the tourism/hospitality industry to address remaining forms of waste and plastic use and waste management, like the single use plastics, PET bottles, and packaging.

In a new legislation, the Kenyan government expects the private sector in the hospitality industry to recycle 50% of their waste by legal waste management companies.

In the new law and policy, the Kenyan government expects the private sector to take its role in reducing the use of plastic and to ensure these plastics are collected, sorted and recycled after use. Once the new Waste Management Bill has been accepted, one year will be given to implement accordingly. The government, through His Excellency has also announced a ban on single use plastic in beaches, national parks and conservation areas as of June 5, 2020. It is very likely that Kenya will be guided by the EU single use plastic ban interpretations. Therefore, we are aware of the urgency to organize ourselves before the looming ban finds us unprepared.

### Gazette Notice No.4858 dated 05 June 2019

**“notice of the ban of use of plastic bottles, straws, and related products within the protected areas in the national parks, national reserves, conservation areas and any other designated wildlife protected areas. The ban shall take effect from 4th June, 2020.”**

**Step one** towards preparation and readiness is The Single Use Plastic Action Plan. The action plan outlines the banned items and recommended alternatives. **Step two** is identification of suppliers who provide these alternatives. **Step three** is linkage of these suppliers to the hospitality and tourism industry for implementation of supply contracts. **This call addresses step two.**

## Scope of Services

The Sustainable Inclusive Business is offering a unique opportunity for providers of non-plastic items (**as identified in the table below**) to showcase their supplies and join a platform which will enable them enter into supplier contracts with hospitality and tourism stakeholders such as hotels, lodges, tour companies etc.
